Overview

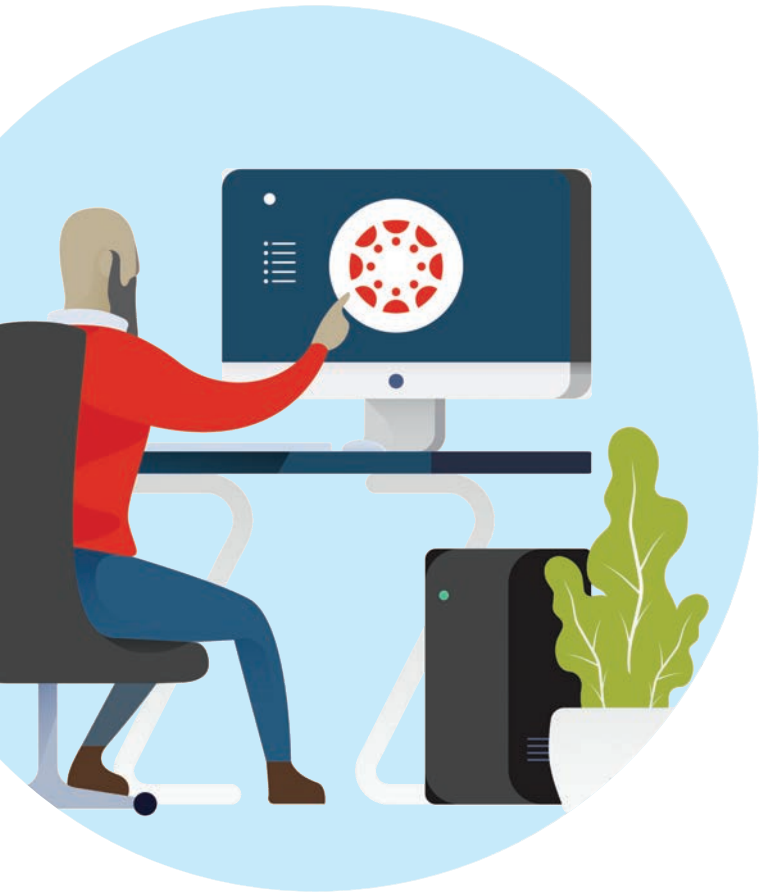

To provide the best possible learning experience for participants at a variety of levels, this online format allows us to deliver this course through micro-learning (bite-size) over a period of 5 weeks with learning, activities and submissions to be completed on a weekly basis.

Each module within the course contains the following elements: video lectures, core and recommended readings, discussions, activities for application of the content and links to useful resources.

What you'll learn

You will be able to:

- ✓ Locate the policies, procedures and resources relating to education in Surf Life Saving NSW
- ✓ Identify learning needs of the participants and the organisation
- ✓ Design training using a range of appropriate learning activities
- ✓ Deliver training using effective communication techniques
- ✓ Evaluate training to ensure continuous improvement

Module Outline

1

Identifying training needs

- Learners characteristics
- Training Needs Analysis (TNA)

2

Designing the training

- Principles of adult learning
- Session plan design

3

Delivering the training

- Creating a safe learning environment
- Deliver a presentation

4

Evaluating the training

- Training evaluation
- Reflection

Online Learning

At SLSNSW, we endeavour to make our online learning interactive, engaging and practical.

We ensure you are not just reading theory but also practising the relevant skills, engaging in peer-to-peer-learning and participating in interactive virtual classroom sessions with your facilitators.

This course will also challenge common myths about online learning and look at some of the ways in which online learning can offer a positive learning experience.

Let's explore why online learning at Surf Life Saving NSW may not be what you initially expect.

Canvas is the online learning platform that you'll use throughout your studies at SLSNSW.

Here, you'll:

- ✓ access learning resources
- ✓ receive announcements
- ✓ collaborate and share ideas with your peers
- ✓ complete learning and assessment activities
- ✓ reflect on your learning
- ✓ receive feedback from your Facilitator

Flexibility and Interactivity

Whether you are an early riser or a night owl, you can access your course content when it suits you. The ability to study at any time means your learning experience is flexible and can fit around your work or family commitments.

You can engage in discussions that unfold over time, giving you the chance to consider, reflect, research, and carefully express your thoughts and ideas. This means everyone has an opportunity to contribute, not just those with the loudest voices or who think fast on their feet.

At Your Own Pace

The modules are released on a weekly basis and Canvas will alert you to new material that has been posted, when you log in.

So much more than just a 'click-and-read' experience, your online learning space is a one-stop-shop for all of your course needs. You can explore content at your own pace, access resources, and communicate with your peers and facilitators.

We want you to be able to learn whenever and wherever it suits you so you will be able to access the online content and activities through the Canvas app or via your PC or Mac.

It is important to give yourself time to absorb and understand the content we are teaching here and to consolidate what you have learned. You will get the best out of your course by regular study of the course material and by participation in the various activities such as quizzes and online discussions which form part of the material covered in each module.

Virtual Classroom

What to expect from our virtual classroom

We are committed to supporting you every step of the way. Our virtual classroom sessions are designed to fit your busy lifestyle, allowing you to learn from anywhere you have internet access.

You will enjoy the same high level of support and attention on your path to reaching your learning goals as you would in an in-person/face to face setting.

The Learning Experience

Interactive virtual classroom sessions

Virtual classroom sessions are held using the latest video conferencing technologies and are designed to be highly engaging and interactive

All virtual classroom sessions are held in real-time, allowing you to attend from anywhere in the world and benefit from the face-to-face interaction

Active community of peers

Work with your peers and fellow course participants to problem-solve during breakout sessions and outside of the virtual classroom sessions

Real world training

Benefit from a market-driven curriculum and gain in-demand skills through hands on projects

Maximum support

Receive extensive support in and outside of virtual classroom from a team dedicated to helping you succeed

Your Commitment Matters

Self-managed/guided learning gives you choices about how and when to study.

To successfully complete this course, it relies on you to put in place an effective time management strategy.

You should carefully plan study times, actively engage with each module, monitor your progress and take time to reflect upon your learning and self-management skills.
